

Aquatic Exploration

Scavenger hunt

Today you will be exploring the museum collections to find creatures that depend on the ocean. Once you've found the organism, draw or write your answers.

Find a marine invertebrate that

Has a home taken from another animal

You can see through

Provides humans with food

Find an ocean tetrapod that

Has feathers

Swims with a fluke

Find an ocean dweller that

Photosynthesizes under water

Provides habitat for animals

Explore the Entomological Collection...

Find an insect that has a larval stage in fresh water

What other ocean creatures do insects remind you of?

Find a marine fossil that

Can only survive in warmer waters

Provides habitat for other animals

Find a marine fish that

Helps an animal underwater

Uses a cool trick to find food

Draw your favourite ocean creature!
