

Creature Features

The Beaty Biodiversity museum is full of interesting animals, plants, fungi, algae, and fossils. While you explore, find cool creatures that have at least one feature in common.

For example, they could all have fins, big sharp teeth, are predators, or they could all be green. Draw them in the boxes, and write their name below your drawing.

What feature do these creatures share?

Why did you choose this feature?

A large, empty rounded rectangular box for drawing a creature.A large, empty rounded rectangular box for drawing a creature.
