

Ocean Biodiversity

Scavenger hunt

Explore the museum to discover more about ocean biodiversity.

Atrium:

Which ocean did the blue whale skeleton come from?

What is the BEST way whales are adapted to ocean life?

Marine Invertebrates:

What family of snails uses venom to paralyze its prey?

Sketch the tool it uses below.

A large, empty rounded rectangle with a thin black border, intended for a student to draw a sketch of a snail's tool.

Herbarium:

Find an alga that humans use as food. What is it?

Which species of algae on display did the Clayoquot First Nations use as a firecracker?

Fish:

Masters of camouflage, seahorses blend into their surroundings to hide from predators. What is another reason seahorses change their colour?

Fossils:

Find the fossilized Carboniferous reef on display. Name and describe two types of organisms found in the fossil.

1. _____

2. _____

Entire Museum:

In your opinion, which ocean animal is the coolest? Why?

Draw it below.

A large, empty rounded rectangle with a thin black border, intended for a student to draw an ocean animal.
