

# Ocean Pair-Up

Scavenger hunt

Explore the museum to find ocean creatures that are related in some way. Look for familiar organisms, and words like ocean, marine, aquatic and sea. Open drawers, talk to our volunteers, and examine our exhibits. Draw the pair in the boxes, and don't forget to write down what they are!

*Hint: You'll need to think about some of the answers!*

**These organisms are in the blue whale's food chain.**

--	--

**One of these organisms provides habitat for the other.**

--	--

**This ocean creature is eaten by that ocean predator.**

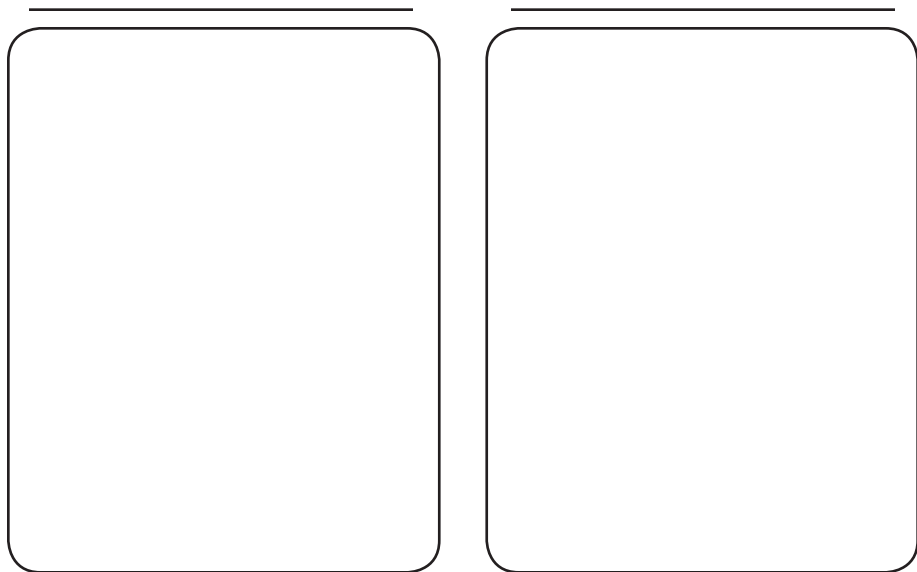

--	--

**These creatures live in the same habitat within the ocean.**

--	--

**These organisms eat the same food.**

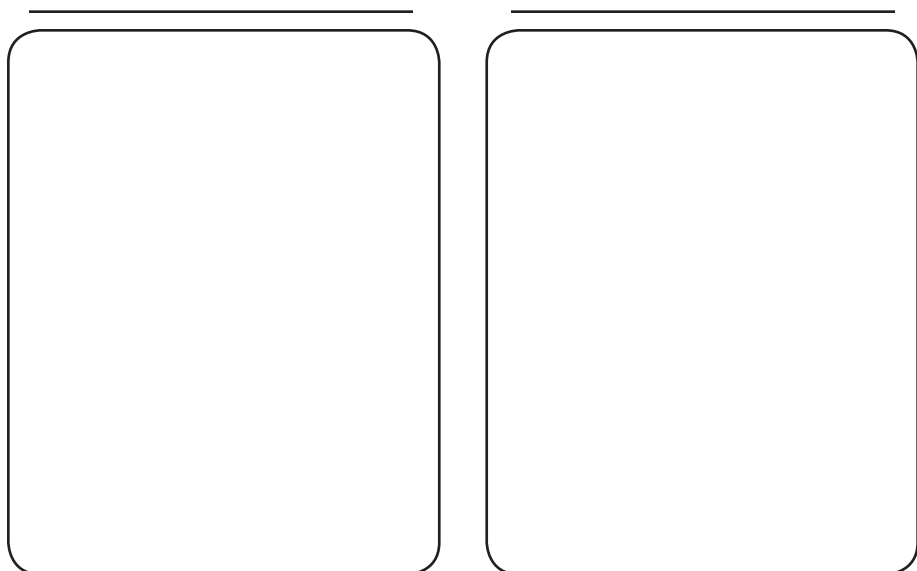

They eat: \_\_\_\_\_

Two empty rounded rectangular boxes for drawing organisms.

**Both of these creatures are the same colour (or colours).**

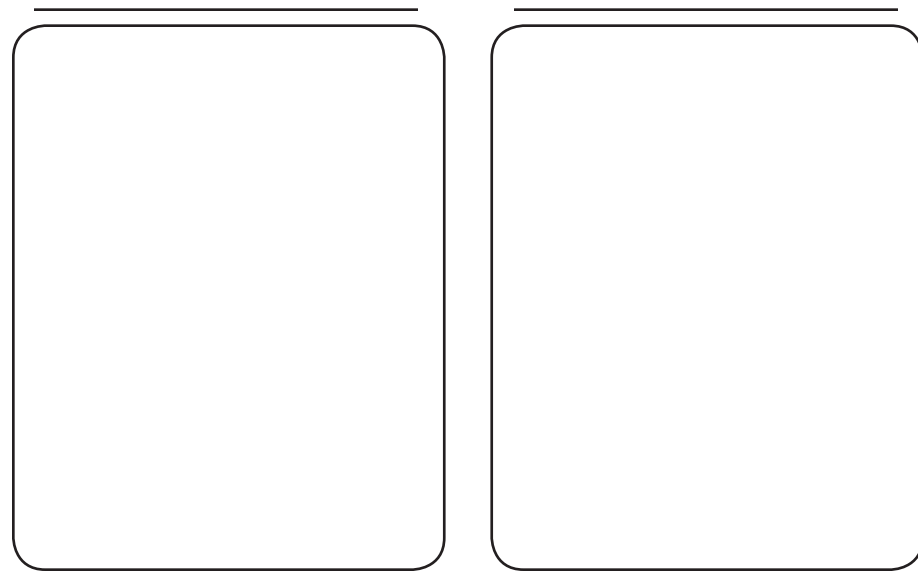

What colour(s) are they? \_\_\_\_\_

Two empty rounded rectangular boxes for drawing organisms.

**This pair helps each other.**

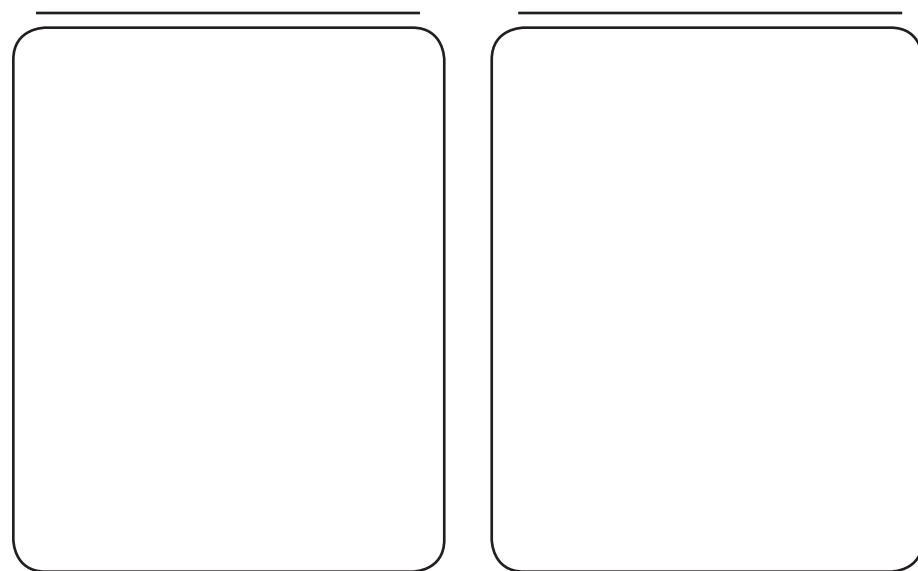

What do they do? \_\_\_\_\_

Two empty rounded rectangular boxes for drawing organisms.

**These organisms have one physical feature in common.**

What is it? \_\_\_\_\_
